## Hotondo Homes Builders Celebrate First Year in New Office

First birthday celebrations are underway for Hotondo Homes builders Russell and Jenny Pearse as they mark a successful first year in their new office.

Russell and Jenny moved their business to the office at 93 Barkly St, Ararat, 12 months ago and have had a busy year due to the extra exposure the office has received at its new location.

“We’ve had a very busy year and we are enjoying operating our business from such a prominent position in Barkly Street next to the Post Office as this makes our office very accessible,” Jenny said.

“Since opening 12 months ago we have added an extensive display area that includes the products and suppliers we use in our homes. This makes selections much easier for our clients as they can see exactly what products we offer which will help them visualise their home’s interior.”

“There have also been several technical milestones achieved, with the construction of a home rated at over 7 Stars for energy efficiency, and Russell has qualified as a Thermal Performance Assessor, making design of comfortable and affordable homes a one-shop-stop experience. Virtually all our homes now under construction are rating 6 Stars or better.”

Clients who visit the office can view more

than 90 floor plans and each design can be modified to suit individual needs of the customer. All clients also receive fixed-price contracts before the construction of their home gets underway so they aren’t surprised by any hidden extras further into the building process.

To cater for growing demand Russell and Jenny have welcomed Darren Scannell into the business as supervisor and building manager.

“Darren has extensive experience in the building industry and is enjoying liaising with clients and trades to produce an excellent result and to ensure a high quality of workmanship in the homes that we build in Ararat, Stawell, Halls Gap and surrounds,” Jenny said.

“Darren has settled into the area well and is getting to know the community. He has also joined the local fire brigade.”
