Miccio – The GreenSmart Builder

When building a new home it's important to find out what options are available to make your home as environmentally friendly as possible.

Local Hotondo Homes builder Frank Miccio is an accredited HIA GreenSmart builder which means he has the training and experience needed to build environmentally friendly homes and has an understanding of the techniques and materials that can be incorporated into the home's design.

The HIA gives GreenSmart accreditation to builders who have completed the prescribed training

and adhere to strict environmentally friendly building guidelines. The GreenSmart approach to building aims to benefit the environment by increasing energy efficiency, reducing water consumption, and minimising waste throughout the construction process.

Benefits such as lower heating and cooling costs, reduced energy use and water consumption can be achieved for homeowners who use a GreenSmart accredited builder to design an environmentally sustainable home.

Frank and Sandra Miccio have more than 90 floor plans for clients

to choose from and they will work with the client to ensure the home's position and design offers environmental benefits for years to come.

For more information about building with Frank and Sandra Miccio from Hotondo Homes visit their display office at Shop 1, 21 Sanger St, Corowa. The office is open Monday, Tuesday, Thursday and Friday, 9.30am-5pm. Appointments can also be made for after hours or weekends. Call (02) 6033 0016 or visit www.hotondo.com.au.
